**Subject:** call for NON ATTAINMENT designation

Dear Mr. Michael Jay

As a resident of Labadie, MO and a teacher in Franklin County, I am begging for the EPA to designate that this area be designated a non-attainment area in terms of the SO<sub>2</sub> in the air from the Labadie Power Plant emissions. These emissions are known to be a lot higher than allowed by the Clean Air Act and Ameren needs to be held accountable by the EPA as well as the MODNR. We have a strong local community but the incidents of aggravated asthma is common in the population and much higher than the national norms. We know how Ameren can manipulate the emissions test results by placing their monitors in areas with lowest impact due to the local weather patterns. We are also well aware of how Ameren tries to manipulate the MODNR and the EPA to bend to their defense. And the local community is tired of the politics and fowl play Ameren plays by just to make an extra buck at the expense of the health of the local citizens.

Ameren Labadie needs to clean up its mess by [putting in scrubbers to clean up the emissions coming from the plant. The monitoring sites need to be approved by the EPA to ensure the clean-up measure are working and the public is safe. It is time to do the right thing for the people of this state.

Thank you for your time,  
Janet Dittrich
